(3) Off-Duty Education. (a) Facilitates enrollment of military personnel in the program offered by the United States Armed Forces Institute, and arranges that this program is made known to all military personnel of the camp.

(b) Obtains supplies of discussion pamphlets, textbooks and other instructional materials.

(c) Organizes and supervises on-duty and off-duty study classes.

(d) Obtains, administers and grades tests for study classes.

(e) Using General Educational Development Test score as a basis, attempts to secure high school diplomas for military personnel.

7. TRAINING FILM LIBRARY. - See SIGNAL.

8. TRANSPORTATION. - a. General. (1) Arrangements for movement of individuals or groups of any number by commercial transportation will be made through the Camp Transportation Office, Bldg H-4217, phone 438. In the case of groups of 40 or more persons, 72 hours advance notice should be given the Transportation Office, so that the necessary equipment can be secured.

(2) It will be necessary to present two copies of orders directing travel to secure transportation requests.

(3) Authorized personnel desiring shipment of personal effects will present two copies of orders directing travel and sign the necessary forms, after which shipment will be handled. In case movement by van is desired, three copies of order are required.

(4) Agencies desiring the shipment of supplies will furnish the Camp Transportation Office one copy of War Department Shipping Document to permit the securing of a routing or to determine best method of shipment.

(5) All inbound LCL shipments will be delivered by carriers to Transportation Warehouse (no 34, 278th St). The various agencies for whom shipments are ultimately intended will pick up their shipments at the aforementioned warehouse. If shipment consists of an entire truck-load, truck will be dispatched to proper warehouse.

b. Responsibilities. (1) Responsibility for correct packing, crating and marking rests with the agency making the shipment.

(2) In the case of carload shipments a representative of the Camp Transportation Office will check all cars for proper loading and bracing prior to sealing for shipment.

(3) Less than carload shipments will be checked by a representative of the Camp Transportation Office before or during loading on trucks. Attention is invited to the fact that LCL shipments must be marked and numbered in sequence. Shipments will not be made where used containers are being utilized from which old shipping information has not been removed.

(4) On inbound carload or truckload shipments, each agency will provide the Camp Transportation Office with an unloading report. Attention is invited to the fact that the seal record is particularly important; the numbers of all seals must be shown. A supply of unloading report forms may be secured from the Transportation Office.

(5) All agencies using spanners will stack them in a neat and orderly fashion at the ramp nearest the unloading or loading area.

(6) Removal of dunnage, wire, scrap metal, etc, from the unloading area is a responsibility of the agency in charge of the unloading and in no case will debris be left alongside the tracks over night.

(7) Regulations require that cars be left in condition for immediate re-use. To accomplish this end, all agencies will remove all material foreign to the car before reporting the car as empty.

9. TRASH, SALVAGE MATERIALS, AND FOOD WASTE, SEPARATION OF. - See General Order No 16, this Hq, dated 1 May 45, subject, "Handling of Salvage, Garbage and Trash".

10. TRESPASSING. - a. The entire boundary of the Camp Hood military reservation is definitely and clearly marked by signs placed at regular intervals on the boundary fences.

b. Persons will, under no circumstances, enter an impact area without first securing information from the Camp Range Officer (Camp Headquarters Building) that there is no firing on the range and that the range is clear.

c. Under no circumstances will boundary fences around the Camp Hood military reservation be cut, unstapled or the wires, posts or gates disturbed in any manner to permit the egress or ingress of any type of vehicle or for foot troops with the exception of fire fighters, fire fighting equipment, or when it is the means of saving human life.

d. The personnel of this command will not trespass on private property. Particular care will be exercised over property adjacent to the reservation. Organizations in the vicinity of private property will warn all their personnel of this matter.

11. TROOPS. - See FOOT TROOPS AND PEDESTRIANS.

1. UNIFORM. - a. General. - (1) War Department instructions require that military personnel appear habitually in uniform.

(2) The following approximate periods or seasons are designated for the wearing of cotton and woolen uniforms; exact dates of change will be announced at the proper time:

1 April to 14 November, inclusive - cotton
15 November to 31 March, inclusive - woolen.

(3) The Camp Provost Marshal is charged with the responsibility for the enforcement of the provisions of these regulations with respect to the wearing of the uniform outside the limits of this reservation. It is the responsibility of organization commanders to insure that troops under their command are properly clothed and present a neat appearance while in garrison. Each individual concerned must be impressed with the necessity of presenting at all times and in all places a neat, orderly and soldierly appearance.

b. Under the provisions of paragraph 7, AR 600-40, 31 March 1944, with changes thereto, articles of the uniform as indicated below are prescribed for habitual wear by all military personnel within the territorial limits of the Eighth Service Command, when outside the limits of their post, camp or station, on leave, furlough, pass or "off duty" status:

(1) Officers, warrant officers and flight officers (male). - Articles listed in paragraph 8a(2), AR 600-40, and related paragraphs shown therein, except:

(a) The authorized coat, according to season, is optional. However, when the winter uniform is prescribed and the coat is not worn, the woolen shirt will be worn.

(b) Low shoes of commercial pattern, Army russet color, are authorized.

(c) The jacket, field, wool, men's, and jacket, field, summer, men's, is authorized for wear as prescribed in Sec XI, WD Circular 294, 1945.

(2) Enlisted men. - Articles listed in paragraph 9a(2)(a), AR 600-40 and related paragraphs as shown therein, with the same exceptions set forth in subparagraphs (a), (b) and (c) above.

(3) Women personnel of the Army. - As prescribed in AR 600-37, 16 April 1945, with changes thereto.

(4) Army Nurses, Physical Therapy Aides and Hospital Dietitians. - The wearing of the uniform will be as prescribed in AR 600-37.

c. Additional provisions. - (1) Nothing in these regulations will be construed as limiting the authority of the commanding officers to prescribe authorized articles of uniform for personnel on assigned duties. Authority to prescribe the uniform to be worn by troops in maneuver areas is reserved to commanders of units involved.

(2) At War Department theaters, post exchanges or USO shows given in the unit recreation halls, enlisted personnel will be suitably and properly clothed in articles of issue uniform clothing only, at all times.

d. Summer Uniform. - Effective 15 April 1946 all members of the 1848th SCU will habitually wear the summer uniform herein prescribed.

(1) Duty hours (reveille to retreat). -

Shirt, cotton, khaki
Trousers, cotton, khaki
Cap, garrison (QM issue)
Shoes, service or low quarter
Socks, plain tan or brown
Belt, web, waist

(2) Off duty hours (holidays and retreat to reveille). -

Shirt, cotton, khaki
Trousers, cotton, khaki
Necktie
Cap, garrison (cap, service, may be worn by officers)
Shoes, service or low quarters (tan or brown with smooth toe)
Socks, plain tan or brown
Belt, web, waist

(3) Miscellaneous. - Officers may wear trousers and shirt of summer worsted (or similar cloth) or trousers and blouse (or ETO jacket) of the same material with shirts, cotton, khaki, during off duty hours.

2. UTILITIES, USE, MAINTENANCE AND REPAIR OF. - a. Work Order Requests- See Sec VI, WD Circular 66, 1946.

b. Utilities. - (1) Requests for maintenance or repairs of any nature to buildings, utilities, walks or grounds will be reported to the Post Engineer, telephone 682 at South Camp and 315W (night - 312W) at North Camp. Emergency service is available daily from 1700 until 0800 and all day Saturday, Sunday and holidays by telephoning 400 South Camp and 315W North Camp.

(2) No change of partitions, doors, windows or any other alterations will be permitted in any building without approval of the Camp Commander and then only under direct supervision of the Post Engineer.

(3) No materials, new or salvage, such as: lumber, screening, gravel, sand or cement will be taken from any stock pile located anywhere on the camp site without authority in writing from the Post Engineer.

(4) No addition to, or change of, any utility equipment, such as: electrical wiring, plumbing or heating, will be made by any organization without the prior approval of the Camp Commander and then only by the employees of the Post Engineer.

(5) No paint, regardless of the source from which obtained, will be used on the exterior or interior of any building in the camp without authority in writing from the Camp Commander.

(6) No soil erosion preventives, sidewalks, ditches or driveways will be initiated by anyone but the Post Engineer. This also applies to the alteration of any existing walks, roads, fences, culverts, bridges or similar installed butresses for prevention of soil erosion.

(7) No landscaping, cutting of trees, planting of shrubs or similar beautification projects will be initiated or carried out without prior approval in writing from the Camp Commander and then only under the supervision of the Post Engineer.

(8) The lighting of pilot lights, maintenance of electrical and heating equipment and the adjustment or alteration to control mechanism for the above will be made only by employees of the Post Engineer.

(9) The use of gasoline field ranges in any building in Camp Hood is strictly forbidden.

(10) No additional equipment requiring electrical energy for coffee makers, toasters or other labor saving devices will be installed in any building except by the Post Engineer personnel.

(11) No persons other than employees of the Post Engineer are to be allowed to enter the Post Engineer's Shop Area without written authority of the Post Engineer, or higher authority.

(12) All requests for signs of any nature are to be initiated through the office of the Camp Commander, made and installed by the Post Engineer employees.

(13) Signs will not be removed or taken down. In case a sign is accidentally knocked down, report of same, giving the location of the sign, will be made to the Post Engineer, telephone 682.

(14) Everyone concerned will take necessary measures to see that all outside lights of any description (including flood lights on outside of buildings and around motor park gasoline stations) are not left burning in the daytime. Strict measures to effect economy with electricity, gas and water will be practiced at all times.

(15) All requests for maps of any type will be initiated through the Camp Commander to the Post Engineer.

(16) Burned out light bulbs and fuses will not be destroyed, as these items must be turned in to the Post Engineer when replacement is desired.

(17) In extremely cold weather when there is an imminent danger of freezing, each officer in charge of buildings containing plumbing fixtures will take necessary action to prevent water of any such fixtures from freezing. Fires will be kept burning in such buildings of they are to be occupied, or water will be permitted to drip from all faucets if the building is not to be occupied.

(18) In order to prevent mud, slush, trash and other foreign matter from being washed into sewer lines through the floor drains, especially in latrines, unit commanders will take such necessary action as will insure that the screen floor drain covers are closed at all times, particularly when the floors are being scrubbed.

c. Maintenance of walk-in boxes, refrigeration. - (1) Periodic cleaning of racks, shelves, meat hooks, floor and walls is essential to sanitation.

(a) Racks, shelves, and meat hooks, and floor gratings if used, should be removed and thoroughly scrubbed, employing a stiff brush. The use of a mild solution of baking soda after scrubbing for rinse purposes will maintain these items "sweet". Do not use vinegar, caustic or salt solutions for washing and rinse purposes. All items should be dried before replacement in cooler.

(b) Where interior of cooler is of tongue-and-groove wood, the use of excess water or scrubbing compounds on floor and walls should be avoided. A stiff brush lightly dipped in cleansing solution is suggested, followed by a wiping down of all surfaces with dampened cloths soaked in baking soda solution. All surfaces should be thoroughly dried.

(c) Where cooler interior is of cement, without visible breaks into insulation, scouring and scrubbing with a stiff brush is suggested, followed by rinsing. All surfaces should be allowed to dry naturally.

(d) The cleaning period shall be scheduled after the mess hall closes in the evening. This will enable the refrigeration unit to regain the desired temperature, that is lost while cleaning, during the night when normal daytime opening and closing of the doors is not experienced.

1. VEHICLES, CIVILIAN. - No registration of privately owned vehicles with the Provost Marshal, Camp Hood, will be required in the future with the exception that military or civilian personnel at Camp Hood will inform the Provost Marshal of the description of vehicles and current state license number under which vehicle is operated.

2. VETERINARY SERVICE. - a. Cattle, chickens, goats, sheep, rabbits, pigeons or tamed wild animals will not be maintained on the reservation by members of the garrison except by permission of the Camp Commander.

b. Veterinary service will be provided by the Camp Veterinarian and will include the following:

(1) Inspection of foods of animal origin.

(2) Inspection of civilian establishments employing food products of animal origin.

(3) Necessary professional medical care of animals on the reservation.

c. Dogs and Cats. (1) All dogs and cats will be registered at the Camp Veterinary Hospital within seven days after arrival in the camp. All dogs and cats on the reservation will be given an anti-rabies vaccination once each year by the Camp Veterinarian, who will issue a Certificate of Vaccination and a metal tag to the owner. A copy of the Certificate of Vaccination will be furnished to the Provost Marshal. The cost of the vaccine, not to exceed fifty cents, will be borne by the owner. All dogs and cats will be presented at the Camp Veterinary Hospital for vaccination against rabies.

(2) All dogs and cats that have not been innoculated during the preceding twelve months will be impounded at the Camp Veterinary Hospital. For five consecutive days a notice giving the description of such dogs and cats will be published in the Daily Bulletin. If not called for in this period they will be destroyed or otherwise disposed of upon instructions from the Provost Marshal.

(3) Dogs and cats will not be kept in barracks of enlisted personnel or officers.

(4) Any person bitten by a dog or cat on this reservation will conform to the following procedure: Report to the Station Hospital for treatment. Notify the Provost Marshal giving location of dog or cat so it may be caught and isolated at the Veterinary Station Hospital. The veterinarian will observe the animal and notify the officer in charge of the clinic in time to permit anti-rabies treatment. The owner of the dog will pay expenses connected with hospitalizing the animal.

1. WEAPONS. - a. All persons, other than officers, are prohibited from having arms, ammunition, and other explosives in their personal possession except on official duty or when specifically authorized by the Camp Commander. Enlisted personnel quartered with their organizations will be required to keep privately owned arms and ammunition deposited in the organization supply room. Company and detachment commanders will keep at all times an up-to-date list of all arms owned by enlisted personnel of their command.

b. Knives, having a blade of more than two and one-half inches in length, are considered weapons. The carrying of such a knife on the person is regarded as carrying a concealed weapon and is, therefore, prohibited.

ANNEX NO 1

RANGE REGULATIONS

1. RANGE OFFICES, FACILITIES, INFORMATION. - a. Range Offices and facilities are located as follows:

Camp Range Office
Located in Camp Headquarters
Phone 2343

Range Central Office
Located at 54th St and Range Road South

Range Shop No 1
Located Range Road South - West of RJ 346
Phone Rural 18 - Ring 2

b. The following material giving additional information on ranges and training areas is available at the Camp Range Office, Headquarters, Camp Hood, and will be distributed upon request, generally through Group or higher headquarters in the numbers indicated below:

ITEM	NORMAL ISSUE
Map, scale 1:62,500 Range Map, Camp Hood, Texas Issue 4, 1 Aug 45	1 per Co or Btry
Memorandum, Unnumbered Description Direct Fire Ranges 15 Aug 45, Appendix 2	1 per Co or Btry
Map, scale 1:25,000 Camp Hood Administrative Map September 44	1 per Bn
Map, scale 1:25,000 Camp Hood Administrative Map Training Area Overprint	5 per Bn
Booklet, Unnumbered Survey Control Data 1 Oct 44	1 per Bn (FA)

2. ASSIGNMENT AND SCHEDULING OF RANGES AND TRAINING AREAS. - a. Coordination of the use of ranges and training areas will be scheduled by the Camp Range Office. Requests for use of range and training areas will be forwarded by all units in training to Camp Range Office. Requests will be submitted by Headquarters generally not smaller in

size than a Group, will cover a period of one week beginning on Monday, and will be submitted in time for receipt at the Camp Range Office by 1700 Thursday of the second week previous to the week for which request is made. A Camp Range and Training Area Bulletin will be prepared to be distributed on the Monday following the receipt of the requests, and will contain the assignment of all ranges and training areas to units for the week beginning the following Monday.

b. Requests for TRAINING AREAS will indicate desired areas by zone and lettered subdivision designations in accordance with map, Camp Hood Administrative Map, scale 1:25,000, September 1944, Training Area Overprint. If further subdivision than is shown on this map is desired, any specific area can be described by grid coordinates, natural boundaries, or overlay. Requests will indicate days and hours for which use of areas are requested.

c. Requests for DIRECT FIRE RANGES will contain the following information:

(1) Designation of unit making the request and name of responsible officer.

(2) Types of ranges and number of firing points desired.

(3) Days and hours for which each range is requested.

(4) Weapons and ammunition to be fired.

d. Requests for INDIRECT FIRE RANGES will contain the following information:

(1) Designation of Group and Battalion making the request and name of responsible officer.

(2) Days and hours for which range is requested.

(3) Weapons and ammunition to be fired to include types of fuzes to be used, identification of weapons, projectiles and fuzes by M number, and a statement as to whether or not time fire will be used.

(4) An overlay prepared from Camp Hood Photomap, scale 1:25,000, and showing the following information:

(a) Location of gun position with coordinates indicated.

(b) Impact area designated by minimum and maximum ranges and left and right limits of fire. Azimuths to be measured clockwise from Grid North.

(c) OPs to be occupied and proposed access routes thereto.

(d) Proximity of friendly troops and any other information required which will be needed for checking safety provisions in accordance with AR 750-10.

e. The Camp Range Office will issue, in advance, a clearance card for each range or indirect fire firing point authorizing firing by a certain Unit, for certain specified days and hours. One copy of this card will be signed by the Officer in Charge of Firing and returned directly or through channels to the Camp Range Office so as to reach that office before firing begins. The other copy will be retained by the Officer in Charge of firing as his authority to use the Range or Firing Point and will be shown, upon request, to any member of the Camp Range Forces. Clearance card must be in possession of officer, or NCO, in actual charge of firing on the range at all times until firing ceases.

f. Units assigned ranges will be on the range ready to commence firing at the time for which they have requested the range and which is specified in the Range and Training Area Bulletin. If, for any reason, a unit is unable to meet the appointed time or to use the range, that unit is responsible for notifying the Camp Range Office not later than 1700 of the day previous to that on which firing is scheduled. This will permit reassignment to another unit if necessary and avoid misuse of facilities available.

3. THE OFFICER IN CHARGE OF FIRING. - a. Each unit firing on the ranges will be in immediate charge of an officer in charge of firing at all times while on the range and this officer will be responsible for:

(1) Signing the clearance card thereby indicating that he has read Camp Range Regulations and also is familiar with special arrangements peculiar to his particular range.

(2) Designating a substitute to take his place at such times when he (the officer in charge) has to leave the range during firing hours.

(3) Enforcing safety regulations for the range of which he is in charge, in accordance with provisions of AR 750-10, and such Field Manuals of the 23 - series as apply to the weapons and ammunition in use, and a thorough understanding of Camp Range Regulations.

(4) Providing details to be posted as Range Guards by Camp Range Officer when necessary in the opinion of the Camp Range Officer.

(5) Starting firing at the authorized time and stopping promptly at the authorized time, or requesting extension of time.

(6) Maintaining liaison with the Camp Range Officer directly or through Unit Range Officers to insure keeping all firing within safe limits. This is especially important on combat ranges, and any other ranges where a wide angle or other special type of firing is to be conducted.

(7) Reporting all duds to the Camp Range Office with the most accurate location that can be given, and marking duds with a red flag or any other easily recognized marker when possible.

(a) Artillery duds. It will not always be possible, upon the completion of firing, for artillery units to enter into the impact area due to the fact that this area may be under fire of other units. In such cases Camp Range Office will be contacted and arrangements made for searching parties to enter the area for the purpose of locating and marking duds as soon as possible. Approximate number of duds, based on lost rounds, and estimated location will be submitted from OPs.

(b) Grenade Ranges and areas. It is extremely important that dud reports from these ranges be submitted immediately after firing ceases, since the next unit to use the range must necessarily operate in the dud-covered area. Certain types of grenade duds may be destroyed under supervision of officers who have qualified with the Camp Ordnance Officer and authorized by him to accomplish such destruction. When this is done a certificate stating that the area is clear of duds will be presented to the Camp Range Officer in lieu of dud report. Grenade range dud reports will be accompanied by a sketch indicating location and marking. Dud reports on grenade ranges, whether positive or negative, must be submitted to the Camp Range Office immediately after the unit ceases to use a range for the day.

(8) Extinguishing promptly all fires on his immediate range, or areas adjacent thereto, and calling on the Camp Range Officer for help to combat fires, if such help is required. Reporting all fires coming within his observation.

(9) Taking proper sanitary measures on the range on which he is in charge.

(10) Policing the range at the close of the day's firing, destroying all waste, pasting all targets, salvaging all salvable material, and leaving the range in clean operating condition. This includes:

(a) Hauling away all salvable material such as empty ammunition containers, etc.

(b) Burning all non-salvable combustible refuse such as old targets, wood splinters, tape seals, etc.

(c) Neatly stacking up target materials, pasters, paste containers, etc, in target houses.

(d) Cleaning latrines to include thorough sweeping and washing with water. In this connection brooms are a critical item and will not be removed from the latrines. Left-over drinking water may be used for washing.

(11) All paper targets will be stored with completely new faces unless the same officers and men are returning the next day and will be satisfied with pasted targets.

(12) When a unit is not able to complete its scheduled firing within the hours requested or specified in the bulletin, arrangements may be made with the Camp Range Office to extend the time of firing, but such extension will be made only upon receipt of request two hours in advance of the scheduled time to cease firing.

4. THE CAMP RANGE OFFICER. - a. The Camp Range Officer will be responsible for:

(1) The safe operation of all ranges. He will check the type of ammunition in use and the fields of fire. He will assist in designating danger areas and fields of fire for any special type of firing authorized. He will determine when it is necessary that Range Guards be provided by the unit firing on the range.

(2) Seeing that no firing commences until the time specified on the clearance card, that firing ceases promptly at the time so specified or that extension is requested.

(3) Completely controlling the danger areas, and all arrangements for permitting entrance thereto and egress therefrom.

(4) Maintaining all camp ranges, except heavy maintenance by Post Engineer.

(5) Supplying all types of standard targets and equipment.

(6) Procuring the necessary equipment and material to keep the ranges in safe, efficient operating order.

(7) Operating ranges using fixed motors or self-propelled targets.

5. SAFETY PRECAUTIONS AND DANGER AREAS. - a. Each range, or a group of ranges, is provided with a flagstaff from which a long red streamer may be flown. This streamer will be flown during the hours in which firing is permitted, and in an emergency, the lowering of this streamer will be a signal to cease firing on the range governed by the streamer so lowered.

b. Entrance into the Danger Areas must be cleared with the Camp Range Office. Entry into areas normally assigned to non-firing activities but currently set up as impact area for artillery firing will be under the control of the officer responsible for the artillery fire.

(1) DANGER AREA "A" is the area enclosed by the loop of Range Roads East, South, West, and Owl Creek Road. All personnel is forbidden to enter this area except by previous arrangement with Camp Range Office.

(2) DANGER AREA "B" is the area bounded by the Georgetown Road, Brown's Creek Road, Range Road West, Grid 876 westerly to Cowhouse Creek, and Cowhouse Creek. Entry into this area will be restricted under the same conditions as entry into Danger Area "A".

(3) DANGER AREA "C" is the area bounded by East Range Road, Owl Creek Road and West Range Road. Entry into this area will be restricted under the same conditions as entry into Danger Areas "A" and "B".

c. The size of the reservation makes it impractical to post separate guards to cover all approaches to danger areas. Signs will be posted and permanent barricades erected at such points as is deemed necessary. Danger areas will be as designated in these Regulations or the Range and Training Area Bulletin, and organization commanders will be responsible that danger area maps are posted at all times on organization bulletin boards. Changes and additions in closed areas may be published in the Daily Bulletin during the week, and organization commanders are responsible that this information gets full distribution. All persons, both military and civilian, are forbidden to enter the areas prescribed as danger areas, as announced in the Range and Training Area Bulletin, or the Daily Bulletin, and no person will pass a permanent barricade or sign, or enter upon the danger areas except by previous arrangement with the Camp Range Officer.

(1) The issuance of a clearance card by Camp Range Office for a Direct Fire Range is authority to enter upon the entire area of that range within the limits of the firing point and all target areas. It does not extend beyond the target areas unless so specified.

(2) The assignment in the Range and Training Area Bulletin of an area within the described danger areas is authority to enter the assigned areas within the limits described in the Range and Training Area Bulletin.

(3) The assignment and issuance of a clearance card for Indirect Fire is authority to occupy the gun position and the OPs and to use the specified routes thereto, but is not authority to enter the target area which may be under fire from direct fire ranges or other artillery. Authority to enter target and impact areas for the purpose of establishing targets, making target surveys, marking targets, locating and marking duds, etc, must be obtained by clearing with the Camp Range Office.

6. DUDS AND MISFIRES. - a. The following precautions will be observed in the locating and handling of duds. See also paragraph 3a(7), these regulations. Reference also AR 750-10 and TM 9-1900.

(1) Artillery Fire: Every reasonable effort will be made at observation posts to note the approximate location of duds. As

soon as practicable after firing is completed, a search will be made of the area in which it is thought that duds have fallen. Entry into impact areas will not be made except after having cleared with the Camp Range Office that the area is not under fire. The location of each dud found will be marked by a red flag or some other distinctive location marker if no red flag is immediately available, and the Camp Range Officer notified thereof.

(2) Grenade Ranges and Areas: Some types of grenades may and will be destroyed by competent unit personnel who have been qualified and authorized by the Camp Ordnance Officer to supervise such destruction. Units leaving Grenade Ranges or areas will file at once, with the Camp Range Officer, a sketch indicating the number, type, location, and marking of all duds left behind, or a statement certified by the responsible officer that the areas has been closely policed and is now free from duds.

(3) Range details constructing and repairing targets will be especially careful in searching the area for unexploded shells, grenades, fuzes, boosters, etc, and will mark and report to the Range Office the location of any explosive material found.

b. Misfires will be handled in accordance with the procedure indicated in Par 11, AR 750-10, dated 22 Jan 44, including Change 3. Rounds removed from the gun will be carried forward of the firing line on direct fire ranges or of the gun position, and marked in the same manner as a dud. Defective rounds will not be returned to the Ammunition Depot except by arrangement with the Camp Ordnance Officer in cases where he may desire to take action under the provisions of Sec VII, AR 750-10.

c. The Camp Range Officer will report the location of duds to the Camp Ordnance Officer who will be responsible for their destruction.

d. Organization commanders will warn all military personnel of the danger of handling unexploded shells (duds), grenades, fuzes, boosters, etc. No one other than a qualified technical expert will touch a dud except under the supervision of competent designated authority. Unit personnel trained and authorized by Camp Ordnance Officer may destroy certain types of Grenade Duds.

e. Personnel operating vehicles will be particularly careful when driving in the impact area in order to avoid driving the vehicle over a dud. Particular care should be exercised in driving through grass or weeds where a dud might be concealed from view.

7. ARTILLERY FIRE OVER ROADS. - a. Within the reservation artillery fire may be directed over roads in use, under the following conditions:

(1) Ammunition, fuzes, and fuze settings will be in accordance with AR 750-10, as amended to date.

(2) Units firing will be responsible that guards are posted at

all points where roads pass under the cone of fire and that all traffic entering these sections of the road or roads is advised of overhead firing and held at this point until firing ceases.

(3) Unit firing will provide guards who will be equipped with portable signs of appropriate wording and with red flags. These signs and flags may be obtained by the using units from Range Shop No 1 at South Camp Hood prior to the beginning of firing, and returned to the same shop immediately after firing has ceased.

8. EXPLOSIVE AMMUNITION ON GAS-CAR RANGES. - No explosive ammunition of any type will be authorized on the self-propelled targets.

9. FIRES IN RANGE AREAS. - In addition to the provisions of Par 3a(8), Range Regulations, all sizable fires observed on the ranges or within the impact areas will be reported at once to the nearest Range Shop, telephone Rural 18 Ring 2. Report will include location, type, (grass, brush or trees) and approximate size of fire, direction of wind and proximity of fire to permanent structures such as range buildings, telephone lines, etc.

10. TRACK LAYING VEHICLES. - a. The following regulations covering travel of full-track vehicles on roads at Camp Hood apply only to the roads outside the Cantonment Area of both North and South Camp. Cantonment areas, North & South Camp are defined as follows:

SOUTH CAMP: - The area bounded on the north by North Ave or the line of North Ave prolonged; on the west by an irregular line extending from the corner of North Ave and 72d St southwesterly to the intersection of 305th St and Ave D, thence southerly around the Warehouse, Shop Area and Prisoner of War Camp to Highway 190; on the south by Highway 190; on the east by the easterly limit line of the reservation at Highway 190 prolonged northerly to the intersection with North Ave prolonged.

NORTH CAMP: - Beginning at the intersection of West Ave and 28th St proceeding southeasterly along West Ave to 1st St; thence northeasterly along 1st St to Hq Ave; thence northwesterly to 15th St; thence easterly along 15th St and the loading area to the vicinity of the Sewage Disposal Plant; thence northerly to 18th St; thence westerly to Ave G, including the fuel storage area; thence northerly to 24th St; thence westerly by way of 24th St, North Road and 28th St to point of beginning.

(1) All concrete roads will be used by full-track vehicles with either steel treads or rubber treads, and full-tracks using concrete pavements will run with both treads completely on the pavement.

(2) Blacktop roads will not be used by full-track vehicles except under emergency conditions described below.

(3) Full-track vehicles will use tank trails generally paralleling the roads and at distances of 500 ft or more from the roads. These trails will be constructed by the full-track vehicles themselves. Full-track vehicles will not travel closer than thirty feet to existing telephone pole lines.

(4) When it is necessary for a full-track vehicle to cross a road the crossing will be made as close to a ridge line as possible at a point where the road ditches are shallow. The crossing will be made at approximately a 90° angle and at slow speed to minimize the destruction of the road section.

(5) Full-track vehicles proceeding along trails may come upon an impassable object such as a rock cliff or a stream bed. In such cases it is permissible to take advantage of the nearest road, proceeding only under the following conditions:

(a) Entrance upon the egress from the road section will be accomplished by using a very slight angle of approach and departure in order to minimize the turning movements within the road section and to avoid unnecessary damage to ditches and shoulders.

(b) All such entrance upon or departure from the road section will be accomplished at slow speeds.

(6) Commanding Officers of units equipped with full-track vehicles are requested to route all such traffic to training areas in such manner as to minimize the use of roads by track-laying vehicles.

11. VEHICLES ON RANGES. - a. Vehicles will not enter upon areas of known-distance ranges between firing lines. They will move only over access roads and be parked on the hardstanding areas provided. At North Camp they will be parked behind the 300-yd or 500-yd lines only. Ammunition, equipment, and mess will be unloaded by hand and carried to positions where they will be used. No vehicles will enter rifle pits except with permission of Camp Range Officer.

b. No vehicles will be allowed forward of the firing line on the transition or field ranges except with the approval of and under the immediate direction of Camp Range Officer or his representative.

c. When vehicle-mounted or self-propelled weapons are fired on 1000" ranges, the vehicles will back out of firing position and will not execute turning movements on the firing lines or immediately adjacent thereto.

d. On the ranges where vehicle-mounted or self-propelled weapons are fired, care will be used in the vicinity of the firing line to avoid damage to firing lines, target mechanisms, line of communication or other range facilities.

e. On tactical ranges all vehicles operating in target areas will use care to avoid communication lines, target mechanisms, cable, parapets, etc.

12. RANGE WIRE. - a. Units will exercise particular care on direct fire ranges to avoid damaging phone or bell-wires. Repair work will be accomplished only in cooperation with Camp Range personnel stationed on the range or after obtaining clearance from Range Shops.

b. Field wire will not be picked up from manouver or artillery firing areas unless it can be established without question that the wire is the property of the unit salvaging it. Respect other unit's wire if you wish yours to be respected.

13. EXPLOSIVES AND DEMOLITIONS. - a. Instruction in the use of explosives and the accomplishment of demolitions, using only light charges and very small quantities of explosive may be conducted in any Training Area. When large quantities are to be used, or recurring classes or demonstrations are to be conducted, this instruction will be given only in areas set aside for such purposes or arranged in advance with the Camp Range Office. Such areas presently authorized are the Demolition areas near 930.0-887.8 and near 915.5-870.0, and all Battle Conditioning Courses.

b. In all cases the Officer in Charge of the Unit undergoing instruction, and the Instructor, are responsible for the safety of all personnel within the danger radius. They are also responsible for the protection from damage of all nearby permanent structures.

c. See also AR 750-10 and FM 5-25, the provisions of which will apply.

14. GAS TRAINING. - a. Small quantities of Smoke or Tear Gas only, for training purposes, may be released in Training Areas. The Officer in Charge will be responsible for the following precautions:

(1) The Smoke or Tear Gas will not be released on the windward side of a road in such proximity thereto as to cover the road with a concentration sufficient to make driving a vehicle hazardous. Guards will be placed if necessary but this does not authorize frequent interferences with traffic.

(2) When smoke is released, care will be taken to avoid starting grass or brush fires, and such fires will be promptly extinguished.

(3) Smoke or tear gas will not be released to windward of other units undergoing instruction in such manner as to interfere with that instruction.

(b) When any gas other than smoke or tear gas, or when large quantities of any gas are used, the instruction will be given with the cooperation of, and under the supervision of, the Camp Chemical Warfare Officer. The scheduling of the usage of all Gas Chambers

and of areas for instruction in Chemical Warfare is handled by the Office of the Camp Chemical Warfare Officer. This officer, or his representative, will be responsible.

15. PYROTECHNICS. - a. The use of Pyrotechnics in Training Areas is authorized with the Officer in Charge of the Unit undergoing instruction, and the Instructor, being held responsible for the following precautions:

(1) Before releasing any ground or air flares, signals, bombs, etc, the direction of the wind and the proximity of nearby combustible material will be considered.

(2) No pyrotechnics will be discharged at less than 200 yards from buildings or other installations likely to be damaged by fire.

(3) No pyrotechnics will be discharged at less than 1000 yards distance from the Ammunition Depots, or at greater distance if the velocity and direction of the wind are unfavorable. Varying winds at different levels must be considered.

b. The Officer in Charge and the Instructor are responsible that fires started by pyrotechnics are immediately extinguished. Entry into small-arms or Artillery Impact Areas to extinguish fires will not be made except by clearing with the Camp Range Office.

16. CONSTRUCTION IN TRAINING AREAS. - Units desiring to dig trenches or foxholes for training purposes in training areas will be responsible for properly back-filling these holes before they leave the area except in areas set aside for continuous use of a specific lesson or demonstration. Units placing barbed wire are responsible for its removal as soon as they have finished making use of it. No permanent or semi-permanent structures will be erected in training areas or on ranges without previous approval of the Camp Range Officer or the Post Engineer or both.
