**1. a. Enemy:**

- (1) **GROUND** - An estimated 21,700 troops are disposed in the operational area and the areas adjacent thereto. Of these, 10,425 are combat troops, 10,075 are service troops and 1,200 are base defense troops. Employment of base defense and service troops as combat troops is expected and will materially increase the combat potential. The veteran 16th Division is believed charged with the defense of the Operational Area as well as immediately adjacent areas. It is reported that the enemy has been conducting maneuvers in the Operational Area and in all probability is well acquainted with the terrain and tanks have been observed in target area. (See Intelligence Overlay #1 and #2 for details)
- (2) **AIR** - Higher Headquarters estimate an enemy air force of 200 fighters and 225 bombers. Within three to six hours after sighting our surface craft, the enemy is capable of utilizing the above force against us.
- (3) The enemy is believed to be well equipped with barges and other small craft, thereby making a counter-attack from the sea on our beachhead and flanks a definite capability.
- (4) For strengths, compositions, identification, location and movements of enemy in target area see Intelligence Overlays #1 and #2.

**b. Own Forces:**

- (1) Forces of the SWPA covered and supported by the Third Fleet, continue offensive operations to re-occupy the Philippine Islands.
- (2) The XXIV Corps will land on A-Day at H-Hour in the Dulag-Labiran area on Leyte Island and will seize the Tansum - Burzon - Dulag area; establish and maintain contact with the Corps along the Binasaan River.
